## List of potential street paving projects— needs and corrections possible?

Jess Tuerk <jesstuerk@gmail.com>

Cc: Southeast Neighbors Transportation <southeast-neighbors-transportation@googlegroups.com>

Hello,

I was recently reviewing the list of potential street paving projects provided to council this month and I felt I needed to say something regarding inaccuracies in the wards listed and needs in Ward 2 (see attachment). I know that there is somehow a ranking given to street projects and I certainly don't claim to know what that formula is, but someone from ward 2 needs to speak up and ask why a road like pine canyon or south ridge would be prioritized over almost any street in the Amazon neighborhood, which is a high need, lower SES area with lots of foot, bike, and car traffic? For instance, 32nd street from Willamette to Ferry, or 30th, Ferry, 31st, the speed reduction problems of 33rd etc etc etc— pick almost any road in that neighborhood and it's being used by people shortcutting from arterial to arterial and the road conditions are horrendous— bikers dodging fist deep potholes, no sidewalks, no crosswalks, roads that have been patched for decades... Please drive 32nd Ave and Ferry st. if you have a chance and let me know why it wouldn't appear on a potential list of street repair projects ahead of those listed in the hills where there will be very minimal pedestrian or bike traffic and the road conditions are actually not too bad?

I've circled the ward labels which I believe to be incorrect.

Councilor Keating, and Mr. Inerfeld, I encourage you to drive/bike each of the road sections that are listed in our ward like I just did this morning and then head down to the Amazon neighborhood to do the same.

Is this list something that can be edited or worked on prior to the bond measure appearing on the ballot or are these pretty set by now?

Thanks for the information,

Jess Tuerk Roshak
